

IntegrationMan2

Integration as a Service (IaaS):
Use SAP – nonSAP Integration as a service

HONICO eBusiness GmbH launched IntegrationMan 2 now offering its customers the possibility to use SAP – nonSAP Integration as a Service (IaaS).

Decide whether you would like to purchase IntegrationMan as Software or simply benefit from the integration-service offered to your company by choosing IaaS and save a complete Software and Hardware purchase. Avoid costs created by stopping or slowing down the optimization of business processes.

With its offer, HONICO complements the trend of the fast growing Software-as-a-Service (SaaS) market as well as B2B (Business-to-Business) integration outsourcing. We will guarantee best performance, scalability and system stability using only high end component systems.

A monitoring device will provide you continuous access to your ongoing processes and the certification that all your outsourced business processes will not end up in a "Black Box". You will receive ad hoc service and support and transparency at any time.

SAP® Certified
Integration with SAP NetWeaver®
